Presidential Diary II - Last chance before Armageddon is the sequel to Presidential Diary. It reveals the personal diary of Morton M. Monroe from the period January 2023 to January 2024 and is a continuation of his actions in his first term as President of the United States. While Presidential Diary dealt primarily with problems internal to the United States and North America, Presidential Diary II is more international and theoretical in nature and delves into the root problems leading to the nation being brought to the brink of collapse in the year 2020. The sequel looks at international problems from a different perspective and offers insights on how these problems are to be viewed. At the end it offers President Monroe's political testament, where it documents the ten things that must be done to preserve freedom.

Presidential Diary II catalogues the history of events that have led the United States economy to the brink of destruction. The last half of the book is devoted primarily to historical analysis and documents how the forces of socialism have slowly instituted changes that will turn the United States into a socialist dictatorship. It is a case study in how to destroy a one man one vote republic from within and makes the case that the one man one vote system must be modified or all republics in this form will eventually be overthrown.

The Presidential Diary series is a summary of the massive changes that will be required to extricate this nation from the grip of socialism. These changes are so great that they would of necessity inflict pain on great portions of society. If our government does not soon institute these changes the nation's economy will collapse in hyperinflation and what happens after that is unknown.
