Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) Pierre Deligne

Ideas from quantum field theory and string theory have had considerable impact on mathematics over the past 20 years. Advances in many different areas have been inspired by insights from physics. In 1996-97 the Institute for Advanced Study (Princeton, NJ) organized a special year-long program designed to teach mathematicians the basic physical ideas which underlie the mathematical applications. The purpose is eloquently stated in a letter written by Robert MacPherson: "The goal is to create and convey an understanding, in terms congenial to mathematicians, of some fundamental notions of physics ... [and to] develop the sort of intuition common among physicists for those who are used to thought processes stemming from geometry and algebra." These volumes are a written record of the program. They contain notes from several long and many short courses covering various aspects of quantum field theory and perturbative string theory. The courses were given by leading physicists and the notes were written either by the speakers or by mathematicians who participated in the program. The book also includes problems and solutions worked out by the editors and other leading participants. Interspersed are mathematical texts with background material and commentary on some topics covered in the lectures. These two volumes present the first truly comprehensive introduction to this field aimed at a mathematics audience. They offer a unique opportunity for mathematicians and mathematical physicists to learn about the beautiful and difficult subjects of quantum field theory and string theory.

From reader reviews:

Shannon Harvey:

Have you spare time for a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a wander, shopping, or went to the particular Mall. How about open or perhaps read a book entitled Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2)? Maybe it is to become best activity for you. You know beside you can spend your time with the favorite's book, you can better than before. Do you agree with their opinion or you have various other opinion?

Jerry Day:

This Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this e-book incredible fresh, you will get data which is getting deeper you read a lot of information you will get. That Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) without we know teach the one who reading through it become critical in thinking and analyzing. Don't become worry Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) can bring once you are and not make your handbag space or bookshelves' come to be full because you can have it in the lovely laptop even mobile phone. This Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) having great arrangement in word in addition to layout, so you will not sense uninterested in reading.

Charlie Smith:

Why? Because this Quantum Fields and Strings: A Course for Mathematicians (2 Volume Set) (v. 1 & 2) is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will distress you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of advantages than the other book possess such as help improving your ability and your critical thinking technique. So , still want to hold off having that book? If I had been you I will go to the publication store hurriedly.

James Brown:

In this time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The actual book that recommended to you personally is Quantum Fields and Strings: A Course for Mathematicians (2

Volume Set) (v. 1 & 2) this publication consist a lot of the information from the condition of this world now. That book was represented how do the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book appropriate all of you.
