Towards Higher Categories (The IMA Volumes in Mathematics and its Applications)

This IMA Volume in Mathematics and its Applications TOWARDS HIGHER CATEGORIES contains expository and research papers based on a highly successful IMA Summer Program on n-Categories: Foundations and Applications. We are grateful to all the participants for making this occasion a very productive and stimulating one. We would like to thank John C. Baez (Department of Mathematics, University of California Riverside) and J. Peter May (Department of Mathematics, University of Chicago) for their superb role as summer program organizers and editors of this volume. We take this opportunity to thank the National Science Foundation for its support of the IMA. Series Editors Fadil Santosa, Director of the IMA Markus Keel, Deputy Director of the IMA v PREFACE DEDICATED TO MAX KELLY, JUNE 5 1930 TO JANUARY 26 2007. This is not a proceedings of the 2004 conference “n-Categories: Foundations and Applications” that we organized and ran at the IMA during the two weeks June 7–18, 2004! We thank all the participants for helping make that a vibrant and inspiring occasion. We also thank the IMA staff for a magnificent job. There has been a great deal of work in higher category theory since then, but we still feel that it is not yet time to offer a volume devoted to the main topic of the conference.

From reader reviews:

Lidia Hill:

In this period globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The book that recommended for you is Towards Higher Categories (The IMA Volumes in Mathematics and its Applications) this book consist a lot of the information with the condition of this world now. This particular book was represented so why is the world has grown up. The terminology styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. Here is why this book suited all of you.

Kenneth Handy:

This Towards Higher Categories (The IMA Volumes in Mathematics and its Applications) is brand new way for you who has intense curiosity to look for some information given it relief your hunger details. Getting deeper you onto it getting knowledge more you know otherwise you who still having little digest in reading this Towards Higher Categories (The IMA Volumes in Mathematics and its Applications) can be the light food in your case because the information inside this book is easy to get simply by anyone. These books produce itself in the form which can be reachable by anyone, yes I mean in the e-book web form. People who think that in book form make them feel drowsy even dizzy this guide is the answer. So there is no in reading a guide especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the item! Just read this e-book sort for your better life and knowledge.

Phyllis Smith:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you can have it in e-book method, more simple and reachable. This particular Towards Higher Categories (The IMA Volumes in Mathematics and its Applications) can give you a lot of good friends because by you considering this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't learn, by knowing more than different make you to be great folks. So , why hesitate? We need to have Towards Higher Categories (The IMA Volumes in Mathematics and its Applications).

Shawn Hernandez:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library as well as to make summary for some reserve, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the professor want, like asked to the library. They go to there but nothing reading really. Any students feel that looking at is not important, boring as well as can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for yourself. As we know

that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Towards Higher Categories (The IMA Volumes in Mathematics and its Applications) can make you experience more interested to read.
