Algebraic Number Theory (Dover Books on Mathematics)

Edwin Weiss

Algebraic Number Theory (Dover Books on Mathematics) Edwin Weiss

Careful organization and clear, detailed proofs characterize this methodical, self-contained exposition of basic results of classical algebraic number theory from a relatively modern point of view. This volume presents most of the number-theoretic prerequisites for a study of either class field theory (as formulated by Artin and Tate) or the contemporary treatment of analytical questions (as found, for example, in Tate's thesis).

Although concerned exclusively with algebraic number fields, this treatment features axiomatic formulations with a considerable range of applications. Modern abstract techniques constitute the primary focus. Topics include introductory materials on elementary valuation theory, extension of valuations, local and ordinary arithmetic fields, and global, quadratic, and cyclotomic fields.

Subjects correspond to those usually covered in a one-semester, graduate level course in algebraic number theory, making this book ideal either for classroom use or as a stimulating series of exercises for mathematically minded individuals.

From reader reviews:

Clarice Johnson:

As people who live in the actual modest era should be change about what going on or details even knowledge to make these individuals keep up with the era that is always change and progress. Some of you maybe can update themselves by looking at books. It is a good choice for you but the problems coming to an individual is you don't know which one you should start with. This Algebraic Number Theory (Dover Books on Mathematics) is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

Andy Breaux:

This Algebraic Number Theory (Dover Books on Mathematics) tend to be reliable for you who want to certainly be a successful person, why. The explanation of this Algebraic Number Theory (Dover Books on Mathematics) can be one of the great books you must have is usually giving you more than just simple examining food but feed you actually with information that might be will shock your earlier knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed types. Beside that this Algebraic Number Theory (Dover Books on Mathematics) giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we understand it useful in your day task. So , let's have it appreciate reading.

Debra Palacios:

The actual book Algebraic Number Theory (Dover Books on Mathematics) will bring you to definitely the new experience of reading some sort of book. The author style to spell out the idea is very unique. When you try to find new book you just read, this book very acceptable to you. The book Algebraic Number Theory (Dover Books on Mathematics) is much recommended to you to study. You can also get the e-book through the official web site, so you can more easily to read the book.

Karen Garcia:

That guide can make you to feel relax. This particular book Algebraic Number Theory (Dover Books on Mathematics) was multi-colored and of course has pictures around. As we know that book Algebraic Number Theory (Dover Books on Mathematics) has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading this.
