Radio Interferometry and Satellite Tracking (Space Technology and Applications)

Seiichiro Kawase

Radio Interferometry and Satellite Tracking (Space Technology and Applications) Seiichiro Kawase
Worldwide growth of space communications has caused a rapid increase in the number of satellites operating in geostationary orbits, causing overcrowded orbits. This practical resource is designed to help professionals overcome this problem. This timely book provides a solid understanding of the use of radio interferometers for tracking and monitoring satellites in overcrowded environments.

Practitioners learn the fundamentals of radio interferometer hardware, including antennas, receiving equipment, signal processing and phase detection, and measurement accuracies. This in-depth volume describes the nature of the targets to be tracked by the interferometer, helping to clarify the movement of target satellites and what specific information has to be caught by the interferometer. Additionally, engineers find details on applications to practical cases of satellite tracking, covering different types of interferometers, recent technical developments, orbital monitoring and safety control.

Contents: Part I: Radio Interferometer Overview. Antennas. Receiving Equipment. Phase Detection. Signal, Noise, and Precision. Error Factors. Design and Installation. Part II: Geostationary Orbits Overview. Kepler's Laws. Circular and Near-Circular Orbits. Orbit Maneuvers. Perturbations. Station Keeping. Overcrowding and Regulations. Part III: Satellite-Tracking Interferometer Overview. Tracking and Orbit Estimation. Azimuth-Elevation Tracking. Differential Tracking. Longitude Tracking. Range-Azimuth Tracking. Rotary Baseline Interferometer. References. Index.

From reader reviews:

Gerald Patton:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a book. Beside you can solve your trouble; you can add your knowledge by the publication entitled Radio Interferometry and Satellite Tracking (Space Technology and Applications). Try to make the book Radio Interferometry and Satellite Tracking (Space Technology and Applications) as your close friend. It means that it can to be your friend when you really feel alone and beside regarding course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know every thing by the book. So , we need to make new experience as well as knowledge with this book.

Richard Nix:

This book untitled Radio Interferometry and Satellite Tracking (Space Technology and Applications) to be one of several books in which best seller in this year, here is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this particular book in the book retail store or you can order it by means of online. The publisher of this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Touch screen phone. So there is no reason for your requirements to past this reserve from your list.

Mitchell Smith:

The guide untitled Radio Interferometry and Satellite Tracking (Space Technology and Applications) is the publication that recommended to you to see. You can see the quality of the reserve content that will be shown to anyone. The language that author use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, to ensure the information that they share for you is absolutely accurate. You also will get the e-book of Radio Interferometry and Satellite Tracking (Space Technology and Applications) from the publisher to make you far more enjoy free time.

Salvador Perez:

This Radio Interferometry and Satellite Tracking (Space Technology and Applications) is fresh way for you who has intense curiosity to look for some information given it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know or you who still having bit of digest in reading this Radio Interferometry and Satellite Tracking (Space Technology and Applications) can be the light food in your case because the information inside this specific book is easy to get by anyone. These books create itself in the form and that is reachable by anyone, yeah I mean in the e-book type. People who think that in guide form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a e-book especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss this! Just read this e-book type for your better life along with knowledge.
