Java 5.0 Program Design

James P. Cohoon, Jack W. Davidson

Java 5.0 Program Design James P. Cohoon, Jack W. Davidson

Java 5.0 Program Design is about the fundamentals of programming and software development using Java. This new, updated edition takes advantage of the release of Java 5.0, which introduced a number of components that help make program design and development a clearer and more straightforward process. Beginning programmers, especially, will benefit from these changes to the language. Java 5.0 Program Design is targeted for a first programming course and has been designed to be appropriate for people from all disciplines. The authors assume no prior programming skills and use mathematics and science at the level appropriate to first-year college students. The breadth of coverage and the arrangement of the chapters provide flexibility for the instructor in what and when topics are introduced. The basics of problem-solving techniques are introduced in chapter one and then reinforced during the explanations of Java programming and design. In addition, software engineering design concepts are introduced via problem studies and software projects.
