Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series)

Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series)

Intended to bridge the gap between the latest methodological developments and cross-cultural research, this interdisciplinary resource presents the latest strategies for analyzing cross-cultural data. Techniques are demonstrated through the use of applications that employ cross national data sets such as the latest European Social Survey. With an emphasis on the generalized latent variable approach, internationally-prominent researchers from a variety of fields explain how the methods work, how to apply them, and how they relate to other methods presented in the book. Syntax and graphical and verbal explanations of the techniques are included. A website features some of the data sets and syntax commands used in the book.

Applications from the behavioral and social sciences that use real data-sets demonstrate:

- The use of samples from 17 countries to validate the resistance to change scale across these nations
- How to test the cross-national invariance properties of social trust
- The interplay between social structure, religiosity, values, and social attitudes
- A comparison of anti-immigrant attitudes and patterns of religious orientations across European countries.

The book is divided into techniques for analyzing cross-cultural data within the generalized-latent-variable approach: multiple-group confirmatory factor analysis and multiple-group structural equation modeling; multi-level analysis; latent class analysis; and item-response theory. Since researchers from various disciplines often use different methodological approaches, a consistent framework for describing and applying each method is used so as to cross 'methodological borders' between disciplines. Some chapters describe the basic strategy and how it relates to other techniques presented in the book, others apply the techniques and address specific research questions, and a few combine the two. A table in the preface highlights for each chapter: a description of the contents, the statistical methods used, the goal(s) of the analysis, and the data set employed.

This book is intended for researchers, practitioners, and advanced students interested in cross-cultural research. Because the applications span a variety of disciplines, the book will appeal to researchers and students in: psychology, political science, sociology, education, marketing and economics, geography, criminology, psychometrics, epidemiology, and public health, as well as those interested in methodology. It is also appropriate for an advanced methods course in cross-cultural analysis.

From reader reviews:

Doreen Harry:

Here thing why this specific Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) are different and reliable to be yours. First of all reading through a book is good but it really depends in the content of it which is the content is as scrumptious as food or not. Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) giving you information deeper since different ways, you can find any guide out there but there is no reserve that similar with Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series). It gives you thrill looking at journey, its open up your own eyes about the thing which happened in the world which is maybe can be happened around you. It is easy to bring everywhere like in area, café, or even in your means home by train. Should you be having difficulties in bringing the paper book maybe the form of Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) in e-book can be your alternate.

Neil Calvert:

Now a day people who Living in the era wherever everything reachable by interact with the internet and the resources inside it can be true or not demand people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading through a book can help individuals out of this uncertainty Information particularly this Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) book as this book offers you rich info and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it as you know.

Helen Scott:

Many people spending their moment by playing outside using friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to shell out your whole day by examining a book. Ugh, ya think reading a book can actually hard because you have to use the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Smartphone. Like Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) which is keeping the e-book version. So , try out this book? Let's find.

Janice Evans:

Reserve is one of source of knowledge. We can add our information from it. Not only for students but additionally native or citizen will need book to know the revise information of year to be able to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, could also bring us to around the world. With the book Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series) we can get more advantage. Don't one to be creative people? To become creative

person must prefer to read a book. Just choose the best book that suited with your aim. Don't be doubt to change your life at this book Cross-Cultural Analysis: Methods and Applications (European Association of Methodology Series). You can more attractive than now.
