"Who uses these resources?" "How are they delivered?" and "What challenges do service providers face in meeting the needs of the aging baby-boom generation?"

To give students the foundational knowledge they need to meet the needs of their older clients, the authors provide a theoretical framework for understanding the forces that shape older adults' likelihood to seek assistance, include in-depth reviews of the current body of empirical literature in each program area, and discuss the challenges programs and services will face in the future.
