## **Neonatal Respiratory Care Handbook** Elgloria A. Harrison

Neonatal Respiratory Care Handbook is included in the 2015 edition of the essential collection of Doody's Core Titles. Neonatal Respiratory Handbook is an excellent handbook which will illustrate the more common types of procedures that a respiratory therapist, new graduate or an experienced therapist would be expected to perform in the day-to-day operations of a highly specialized unit for children. This book is especially appropriate for respiratory students enrolled in a Neonatal/Pediatric class, particularly during their Neonatal and Pediatric rotation; Respiratory Educators and Residents, within a pulmonary medicine residency; and Respiratory graduates, orienting or completing their orientation in the Neonatal Intensive Care Unit (NICU) or Pediatric Intensive Care Unit (PICU). Neonatal Respiratory Handbook is a valuable tool, as it has all the necessary resources in one handy book. A helpful "how to" guide that a therapist would refer to time and time again, this book is simple and straight forward with numerous pictures and illustrations of various respiratory procedures and/or equipment. Additionally, this book goes a step further in that it looks at the major categories of Respiratory illnesses affecting this patient population and reviews the types of equipment appropriate to treat each disease entity. A skills DVD will also be included and packaged with the book as an added feature. Instructor Resources: TestBank
